Self funded retiree	0%	50%	80%

Contribution Arrangements for Existing Home Care Recipients

A 'no worse-off' principle for contribution arrangements will prevent the 2025 aged care reforms from negatively impacting current home care recipients. What does this mean?

If on 12 September 2024, you were either:
A) Receiving a Home Care Package
B) On the National Priority System
C) Assessed as being eligible for a Home Care Package
…you will make the same or lower contributions once you transition to Support at Home.

Existing Home Care Package recipients who do not pay an income-tested care fee will continue with no such fees under Support at Home. Those who are paying income-tested fees, however, will transition into Support at Home with special discounted contribution arrangements.

Finally, a cap will ensure no individual pays more than $130,000 in non-clinical care costs over their lifetime. This applies to both in-home care and residential care.
