Self funded retiree	0%	50%	80%

Contribution Arrangements for Existing Home Care Recipients

A 'no worse-off principle for contribution arrangements will prevent the 2025 aged care reforms from negatively impacting current home care recipients. What does this mean?

If on 12 September 2024, you were either:

A) Receiving a Home Care Package

B) On the National Priority System

C) Assessed as being eligible for a Home Care Package

...you will make the same or lower contributions once you transition to Support at Home.

Existing Home Care Package recipients who do not pay an income-tested care fee will continue with no such fees under Support at Home. Those who are paying income-tested fees, however, will transition into Support at Home with special discounted contribution arrangements.

Finally, a cap will ensure no individual pays more than \$130,000 in non-clinical care costs over their lifetime. This applies to both in-home care and residential care.
